

## SEEBURGER Print Tool for Automotive

Print inbound logistic data instantly with SEEBURGER LSP PrintBox

The LSP PrintBox will automatically print inbound EDI messages from your customers in a clear readable format. No user interaction is necessary after the system has been started. For printing, the messages are completed using master data and, based on message type, sent to a predetermined printer. For example:

- Delivery schedule & old-new-comparison
- Short-term call off & old-new-comparison
- DELJIT/SYNCRO
- Opel Pick-up Sheet
- Payment notification
- Credit note
- Carrier account statements

### Benefits

The LSP PrintBox is the ideal solution for all companies that need to receive partner messages without needing to respond, and for which complete data integration is not required.

### From the data flow directly to the printer

With the LSP PrintBox the EDI messages will be enhanced with stored master data and then printed instantly in a readable layout.

### Standards

Consistent implementation of common B2B standards and recommendations. All industry specific requirements are covered.

### Future proof

Future changes in EDI message types or established OEM processes will be realized both immediately and centrally.

### Scalability

The solution scales with your growing requirements. Message types for printing can be selected in flexible ways.
